EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Larry Steward on August 11, 2010.

The application has been amended as follows:

Please replace claim 30 with amended claim as follows:

30. A process for producing linear alkyl benzene and linear paraffins, the process including the steps of obtaining a hydrocarbon condensate containing olefins, paraffins and oxygenates from a low temperature Fischer-Tropsch reaction;

a) fractionating a desired carbon number distribution from the hydrocarbon condensate to form a fractionated hydrocarbon condensate stream which is the product of a Fischer-Tropsch reaction;

b) extracting oxygenates from the fractionated hydrocarbon condensate stream from step a) to form a raffinate stream containing olefins and paraffins which is the product of a Fischer-Tropsch reaction;

c) directly feeding the raffinate stream containing olefins and paraffins from step b) to an alkylating stage with benzene in the presence of a suitable alkylation catalyst to produce linear alkyl benzene and linear paraffin; and

d) recovering linear alkyl benzene and linear paraffin.

Please cancel claims 55-59.

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not anticipate or render obvious the limitations of claim 30 part c). The prior Office action asserted that the claimed invention was unpatentable over O'Rear et al (WO 01/64610). However, O'Rear directs the raffinate to an intermediate catalytic dehydrogenation step prior to the alkylation step. The process of O'Rear requires the dehydrogenation step since the C₁₈-C₂₆ fraction from the Fischer-Tropsch reaction is mostly paraffinic, and the reaction requires that the feed to the alkylation of benzene comprise moderate amounts of linear olefins [page 30, lines 7-12].

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN MCCAIG whose telephone number is (571) 270-5548. The examiner can normally be reached on M-F 8-430.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
